

# Top drawer.

In your new home, nothing makes as much of a statement as the cabinetry. The warmth of the wood. The sweeping lines they create. The way they pull all the rooms together. We work with the area's top custom home builders creating homes likely to appreciate in value because of attention to quality design and construction.

## Three designers. Only one you.

No "cookie-cutters" here. Our designers work one-on-one with you to design form and function that complement and enhance your lifestyle. We can suggest and build in all those little extras that your family will use every day, making it easier to enjoy and maintain your new or existing home.

## Superior Fit and Finish. Hometown pride.

Our cabinets will seem like they were made for your house -- *because they were*. Our crews take exacting measurements during the construction process, to ensure your cabinetry is an integral part of your home. Each cabinet is skillfully created individually by local craftsmen who take pride in their work. And we make final tweaks and adjustments on site before you close, to help make your move-in smooth and problem-free.

## Exemplary service. We live next to you.

We are your neighbors, and we care for you. You see our trucks constantly moving around town, delivering cabinets to people who appreciate quality and innovation -- people like you. We support our local schools and their athletic programs because everything we have and everything we are is invested in our community.

# Top shelf.

For most people, building a home is the biggest investment they will ever make. It's wise to plan ahead to protect that investment.

We design cabinets to fit you and your living spaces. That's a much better solution than making compromises based on what's available off-the-shelf. And years down the line, whether you want to expand a kitchen or finally finish off that basement, you won't need to worry if the style of prefab cabinets you bought are still being made and marketed. Instead, we'll be able to create those pieces you need, preserving the style, beauty and superior craftsmanship of your home.

## Distinguishing advantages.

- Work one-on-one with customer
- Three designers with a collective 50 years of experience
- Provide preliminary drawings for plumber, electricians
- Provide 3-D views so customers can visualize the design
